C - FIT YOUR PATIO COVER DIMENSIONS TO THE SITE

A Wall mounting height

The wall mounting profile (top back) can be adjusted from 256.5 to 324 cm (8'5" to 10'8") measuring from the ground to fit your space.

B Pole to wall depth

Poles distance from the wall can be adjusted from 332 to 342.1 cm (10'10" to 11'2") as illustrated in the Diagram.

Decide what height and distance from the wall you would like to mount your patio cover.

This will determine the roof angle.

Please note that while the product appearance may change slightly as a result of that angle, the snow load weight does not change.

SAFETY ADVICE

- It is of utmost importance to assemble all of the parts according to the directions. Do not skip any steps.
- Always wear work gloves during panel sliding.
- Always wear shoes and safety goggles when working with extruded aluminium.
- If using a step ladder or power tools make sure that you follow the manufacturer's safety advice.
- Do not touch overhead power cables with the aluminium profiles.
- Do not climb or stand on the roof.
- Do not attempt to assemble the product in windy or wet conditions.
- Dispose of all plastic bags. Keep them out of reach of small children.
- Keep children away from the assembly area.
- Do not lean against or push the products during construction.
- Do not position your product in an area exposed to excessive winds.
- Do not attempt to assemble this product if you are tired, have taken drugs or alcohol or if you are prone to dizzy spells.
- Make sure there are no hidden pipes or cables in the ground before anchoring to foundation.
- This product is designed to be used mainly as a patio cover.
- Heavy snow load on the roof can make it unsafe to stand below or nearby.
- **The snow must be removed from the structure's roof if the accumulated snow height exceeds 40 cm (1'4").**
- **Make sure to anchor the product directly to a solid foundation to increase the product's stability and wind resistance, especially in areas with severe weather conditions.**

BEFORE ASSEMBLY

- Selecting a site:
 - Choose your site carefully before beginning assembly.
 - Choose a sunny position away from overhanging trees.
 - The product must be positioned and fixed on a flat level surface.
- The product must be secured directly to a solid foundation.
- This is a multi-part assembly best achieved by two people. Allow at least half a day for the assembly process.
- Take all components & parts out of the packages. Sort the parts and check against the content parts list.
- Parts should be laid out close at hand. Keep all small parts (screws etc.) in a bowl so they do not get lost.
- Please note multi-sided profiles are used in this product. As a result some holes in the profiles are not used during assembly.
- Please review entire instructions before starting. Carry out the assembly steps in exact order.
- Please consult your local authorities if any permits are required prior to constructing the product.
- Having purchased a long patio cover, make sure you received all boxes as shown on page 2 of the instruction manual (AVAILABLE MODELS).
- Use only the parts registered in the content list, some parts may be surplus.

IMPORTANT!

- Firmly connect the product to a level surface immediately after completion of the assembly.
- Anchoring this product to the ground is essential to its stability and rigidity. It is required to complete this stage in order for your warranty to be valid.
- During assembly use a soft surface below the parts to avoid scratches and damages.
- We recommend checking for restrictions or covenants for building this product in your area.
In addition we advise to check if you need to submit any forms or if any permit is required prior to building the product.

DURING ASSEMBLY

**During assembly, you will encounter different icons for different products.
Please see below for more information:**

You may use silicone lubricant spray on the frame in order to help you slide the panels into the profiles. Do not spray the panels.

Use a rubber mallet if necessary.

Make sure you remove covering plastic film from both sides of the panel.

All panels with the stamped words "THIS SIDE OUT" must be facing out to create full UV protection. Remove plastic sticker as panels are locked in place.

Steps marked with dashed outlines refer to Extensions only. Some of the steps are irrelevant for an assembly of a single product. When assembling a single or an extended product, some parts may be surplus.

These 2 icons below indicate if screw's tightening is required or not. Temporary tightening of a few screws may be needed to prevent a profile from sliding out. Tighten all screws once assembly is completed.

CARE & MAINTENANCE

- When your product needs to be cleaned, use a soft cloth and rinse with cold clean water.
- DO NOT use acetone, abrasive cleaners or other special detergents to clean the panels.
- Clean the product once assembly is complete.

IMPORTANT ASSEMBLY STEPS

When encountering this information icon during assembly, please refer the relevant assembly step for important additional comments.

Steps / pages marked with dashed outline are referring to the extension kit assembly, should be performed during the Patio Cover's assembly process.

Step 6: Notice, you should continue assembling also if you come across a gutter connection as shown in the round close up.

Step 9: Please apply silicone sealants, in order to prevent water from seeping in.

Step 14: **Pay attention:** When installing the profile on the wall, all other dimensions will be given and will not be changeable.

Step 15: The wall-mounting profile can be adjusted from 239.5 to 306.6 cm (94.3" to 120.7") above ground. The adjusting is done when measuring and drilling.
Refer to the dimension table in Step 14, which provides information on adjusting the distance of the patio cover rods from the wall, Installation height range, roof angle and gutter distance from the wall.

Steps 21, 22: Please apply silicone sealants above beam #9385 / #9393 / #9399, in order to prevent water from seeping in.

Step 28: Anchoring this product to the ground is essential to its stability and rigidity. It is required to complete this stage in order for your warranty to be valid.

Step 35: After peeling of the covering plastic film from both sides of the roof panel, installing the roof should be followed by the below steps (in their order):

- Panel 9420
- Profile 9380 / 9381
- Profile 9374

PRINCIPALES ÉTAPES D'ASSEMBLAGE

Lorsque vous rencontrez cette icône d'information pendant l'assemblage, veuillez vous référer à l'étape d'assemblage correspondante pour d'autres commentaires importants.

Étapes / pages marquées avec un contour en pointillés font référence à l'assemblage du Kit d'extension, doivent être réalisées lors du processus de montage de l'abri de terrasse.

Étape 6: Notez que vous devez poursuivre l'assemblage même si vous rencontrez un raccord de gouttière, comme le montre plus en détail l'image mise en évidence par le cercle.

Étape 9: Appliquer un enduit en silicone, afin d'empêcher l'eau de pénétrer.

Étape 14: **Remarque :** si vous fixez le profilé au mur, toutes les autres dimensions seront prédéfinies et ne pourront pas être modifiées.

Étape 15: Le profilé de raccordement de paroi (supérieur-arrière) est ajustable de 239.5 à 306.6 cm (94.3" à 120.7" po.) au-dessus du sol. Cet ajustement s'effectue au moment de la prise de mesures et du perçage.
référez-vous au tableau de dimensions indiqué à l'étape 14, dans lequel vous trouverez des informations sur le réglage de la distance des tiges de couverture de la terrasse par rapport au mur, la plage de hauteur de montage, l'angle du toit et la distance de la gouttière par rapport au mur.

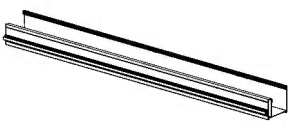

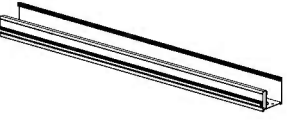

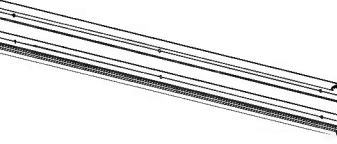

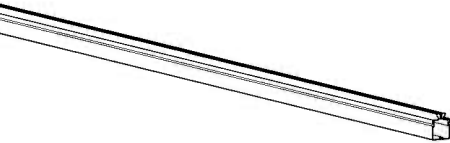

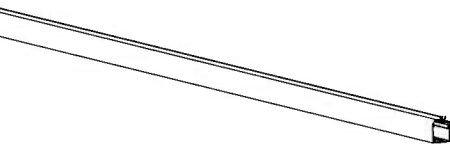

Étapes 21, 22: Appliquer un enduit en silicone sur les poutres #9385 / #9393 / #9399, afin d'empêcher l'eau de pénétrer.

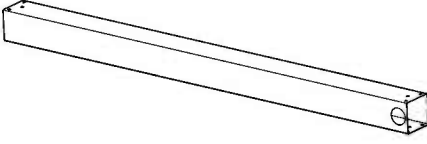

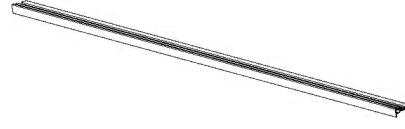

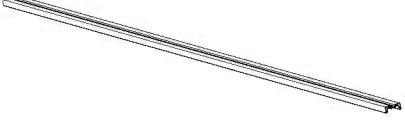

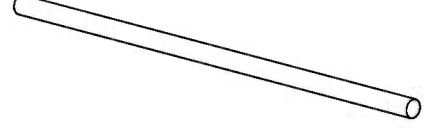

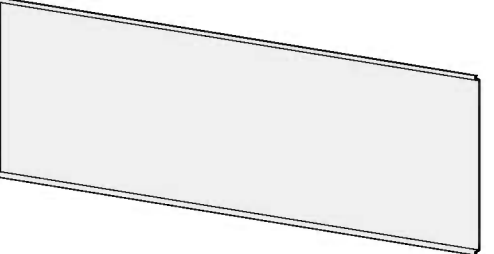

Étape 28: Cette étape d'ancrage du produit au sol est essentielle à sa stabilité et à sa rigidité, elle est de plus nécessaire pour assurer la validité de votre garantie.

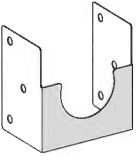

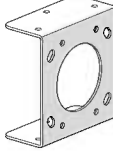

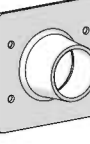

Étape 35: Après avoir décollé le film plastique de revêtement des deux côtés du panneau de toit, l'installation du toit doit être suivie des étapes ci-dessous (dans leur ordre):
