

Your NewAgePet® InnPlace™ Dog Crate

Congratulations on your purchase of the NewAgePet® InnPlace™ Dog Crate made with ECOFLEX®! We've fused style and functionality into a crate that can double as a beautiful piece of home décor. Conveniently designed to be used as an end table or night stand, you'll love showing off this versatile piece of pet furniture. Stainless steel tubes and latches make dogs feel safe and secure even while you're away.

ECOFLEX® is a proprietary composite blend of recycled polymers and reclaimed wood fiber by products. Unlike most other products, the color is in the material and not on it, which prevents fading and discoloration. The material won't twist, splinter or crack. Product is odor, moisture and stain resistant and can be wiped clean with a damp cloth or sprayed down with a hose. ECOFLEX® is always non-toxic and safe for humans and pets.

To help your dog adjust to their new home, we've provided some quick tips:

1. **Familiarize your puppy with the crate.** Put your pup's favorite toy, blanket or cushion inside the crate with the door open and let them get used to being around and going into the crate on their own. (Pro-tip: A blanket with your scent is twice as effective!)
2. **Get your puppy used to spending longer periods of time in the crate.** Once your pup is used to and comfortable being in his or her crate, start closing the door. Start with short intervals and work your way up!
3. **Crate your puppy overnight or when leaving the house.** Once your pup can spend 30 minutes in their crate without being anxious or afraid, you can begin leaving them crated for short periods when you leave the house or overnight.
4. **Patience.** It might take some time for your pet to warm up to their new crate, and that's OK! This process may take several days or weeks. Take your time and don't rush the process. Before you know it your pup will love his crate!
5. **Safety.** While the ECOFLEX® material is durable, it is not Chew-Proof. Please be sure to inspect your crate regularly for signs of wear or pet damage. Your pet's health and safety is our number one priority, and we recommend replacing any worn or damaged crate parts or panels before resuming regular use.

Dogs love the NewAgePet® InnPlace™ Dog Crate!
